Carbon Reduction Plan template

Supplier name **Clear Star Group Limited**

Publication date **March 2025**

Commitment to achieving net zero

Clear Star Group Limited is committed to achieving net zero emissions by 2030.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2023/24
Additional details relating to the baseline emissions calculations:
Our scope 2 emissions come solely from employees working from home. We used the methodology in the EcoAct Home Working 2020 Whitepaper for calculating our home gas and electricity usage. Our scope 3 emissions are primarily driven by our supply chain expenses and business travel. These figures were generated by SME Climate Hub Normative calculator based on spend in £ against different categories of spend.

Baseline year emissions:	
Emissions	Total (tCO2e)
Scope 1	0
Scope 2	3.49
Scope 3 (included sources)	36.72
Total emissions	40.21

Current emissions reporting

We currently have no emissions reporting beyond our baseline year. This Carbon Reduction Plan will be updated once our emissions for 2024/25 have been calculated.

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

- 10% of intensity scope 2 emission reduction from my base year by 2028
- 25% of intensity scope 3 emission reduction from my base year by 2029

Carbon reduction projects

Completed carbon reduction initiatives

At this time, following our first year baseline emissions calculations, we have no completed carbon reduction initiatives.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Incentivising all employees to move onto green electricity tariffs, and where possible green gas tariffs.
- Reducing the emissions from business travel by incentivising the adoption of electric vehicles by company employees.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

Matt White
Director
